Profile

Frontend Developer with a strong foundation in cross-platform and web development. Experienced in building **scalable, high-performance mobile and web applications** using **React Native, React**, and **TypeScript**. Skilled in integrating modern technologies such as **Stripe**, **Google Maps AP**I, and **real-time features** to deliver seamless, **production-grade user experiences**. Adept at collaborating across teams, optimizing performance, and delivering **pixel-perfect UI** with clean, maintainable code. Passionate about leveraging technology to build products that scale and perform flawlessly across platforms.

Areas of Expertise

Cross-Platform Development using **React Native**, Advanced **JavaScript** and **TypeScript**, State Management (**React Query, Context API, Zustand**), Component **Architecture and Reusability**, React Hooks and Functional Components, API Integration and RESTful Services, **Payment Gateway Integration** (**Stripe, In-app purchases**), Google Maps API and Location Services, Deep Linking and Navigation, Push Notifications and Real-time Features, UI/UX Implementation and Responsive Design, Performance Optimization and Code Splitting, **GitHub Version Control** and Collaboration, **Agile Development and Sprint Planning.**

Professional Experience

Software Engineer (Front-End: React Native & React) *Koderlabs LLC* | Jul 2022 – Present

- Built and deployed **Love Post Marked App**, a complete courier service mobile application with integrated USPS shipping functionality, live on Google Play and App Store
- Led front-end development of **Y-Drive App**, a multi-tenant ride-handling platform with booking, scheduling, and Stripe Connect payments, deployed on Google Play & App Store.
- Built **5Sphere App**, a goal-tracking platform with dynamic forms and modular components, improving client workflow efficiency.
- Enhanced **URokz App** with subscription models (freemium & premium) and recurring billing integration, live on Google Play and App Store.
- Implemented **Calling system (telnyx).** Inbound/Outbound Call including features like mute/unmute, hold, ringing, and decline functionalities. Link
- Built **Amplifi App**, enabling users to create and upload motivational reels, videos, posts, and utilized data from social media platforms.
- Developed **CoFit365 App**, a meetup scheduling app with push notifications, real-time chats, Google Maps integration, and complex UI components, live on Google Play and App Store.
- Implemented **deep linking and optimized navigation** across multiple apps, enhancing cross-platform consistency.

- Championed **component reusability, state management (React Query, Zustand, Context API), and performance optimization** across projects.

Freelance React Native Engineer *Self-Employed* | 2021 – 2022

- Delivered cross-platform mobile applications for clients in **education, loyalty, and content delivery**.
- Built **MySOCA – Loyalty App**, integrating push notifications, filters, and Stripe payment workflows, live on Google Play and App Store.
- Developed **EvolvLMS – Virtual Learning Platform**, integrating Zoom SDK, Vimeo, and QR login for interactive online classrooms.

UI/UX Engineer (Front-End: Wordpress) *Koderlabs LLC* | Jul 2020 – Jul 2022

- Designed and Developed responsive, **high-performance Wordpress websites** and user-friendly interfaces.
- Implemented **customized Wordpress themes** using HTML, CSS, and JS to meet specific front-end performance for multiple client projects.

Wordpress Developer *Koderspot* | Jan 2020 – Jul 2020

- Focused on UI development and **front-end performance optimization**.
- Monitored and enhanced front-end performance

Education

BSCS Computer Science Virtual University | 2019 – 2023
ACCP EE in Software Development APTECH Institute | 2018 – 2021

Skills

- **React Native:** TypeScript, React Navigation, Hooks, State Management (React Query, Context API, Zustand), Modular Architecture, Performance Optimization, Offline Storage, Animations, Testing.
- **React & Front-End:** JavaScript (ES6+), HTML5, CSS3, Responsive Design, Component Reusability, Code Splitting, Web Optimization.
- **Integrations & APIs:** Stripe Connect, In-App purchase, RESTful APIs, Google Maps API, Deep Linking, Real-Time Features.
- **Tooling:** GitHub, Firebase, GitHub Actions, Manual Testing.
- **Other Skills:** UI/UX Design, Agile/Scrum, Version Control, Debugging, Team Collaboration.
- **Soft Skills:** Problem-Solving, Analytical Thinking, Communication, Adaptability, Creative Execution, Ownership.
